Alarm Monitoring Station Software in Multiple Languages

Comon Professionals, experienced in Alarm Monitoring Station Consultancy, has provided A-traq software installations in various languages throughout the world. Alarm stations using the right-to-left characters now can benefit from this user friendly, intelligent and effective solution.

One of the most complex central monitoring stations throughout the globe in Muscat - Oman, was renewed by A-traq Monitoring Solutions. The system includes two stations, one as primary and one as backup. **The primary station has two databases, one in Arabic (Right to Left) and one in English. The operator evaluates the alarm in Arabic meanwhile A-traq RAIN module produces reports in English. This is an excellent feature for preparing monthly reports for English speaking alarm station clients.** A-traq won the bid and was selected among other software due to its advantage of flexibility and the short time-frame of implementation in the CMS governed by the Police force of Muscat.

Another monitoring solution is installed in Iran in Persian. Again, all screens and reports in HTML are from right-to-left. A-traq is a unique solution for Alarm Stations using right-to-left orientation.

Users can define, select and modify languages on their own. Alarm Stations have the liberty to select the terms and words they would like to use on the software. A-traq is now available in preset languages such as: Spanish, German, Japanese, Chinese (Simple and Traditional), Portuguese, Italian, Dutch, Norwegian, Russian, French etc.

A-traq has been downloaded by over 2,000 people!

A-traq has been downloaded from more than 12 Countries

BECOME A COMON PROFESSIONALS PARTNER

There is a great opportunity for companies that wish to distribute and support A-traq software! Our partners operate exclusively for the defined regions and generate revenue from licenses and services. There are two major partner programs:

I-PARTNER

(The Integrator Partner)

Companies that wish to resell A-traq to Alarm Monitoring Stations in their region will benefit from Comon Professionals Partner Training and exclusive rights to resell A-traq. Official partners will earn quarterly commissions from sold module licenses, and provide their clients (end users) support and maintenance services. These service fees will be collected by the partner.

B-PARTNER

(The Bundle Partner)

This program is prepared mainly for manufacturers. For example, companies that produce Alarm Receivers may distribute A-traq bundle CD with their devices. Partner earns quarterly commissions for those clients that have licensed A-traq online using the bundle CD. Bundle partner is not responsible for Support or maintenance in this program, however the same partner may apply for I-PARTNER program also.

Simple and Direct Partner Operation

- A-traq licenses are obtained online. System expires automatically upon payment deficiencies.
- Comon International Database Tracks all Partners and End Users licensing and commission information online.
- Potential Customer information downloading the Demo Software is shared with the regional partner.
- Partners do not have to worry about Software Piracy issues since A-traq uses online activation and secure license control.
- All recent versions of A-traq modules are securely available online and very easy to setup.
